Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	07 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Data Collection	USN-1	Import Electricity Consumption Dataset	2	High	Varun Kumar
Sprint-1	Data Collection	USN-2	Validate Electricity Consumption Dataset	2	High	Varun Kumar
Sprint-1	Data Preparation	USN-3	Clean Missing Values	3	High	Surendra Babu
Sprint-1	Data Preparation	USN-4	Create Required Fields & Calculations	3	Medium	Surendra Babu
Sprint-2	Data Visualization	USN-5	Create State-wise and Region-wise Analysis	3	High	Sree Harshini
Sprint-2	Data Visualization	USN-6	Create Month-wise, Quarter-wise & Year-wise Visualizations	5	High	sree Harshini

Sprint-2	Dashboard Development	USN-7	Develop Interactive Dashboard with Filters	3	High	Abhinav Charan Teja
Sprint-2	Story Creation & Publishing	USN-8	Create Tableau Story and Publish Dashboard	3	Medium	Abhinav Charan Teja

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	8	6 Days	29-06-2026	01-07-2026	8	01-07-2026
Sprint-2	8	6 Days	02-07-2026	04-07-2026	8	04-07-2026
Sprint-3	8	6 Days	05-07-2026	07-07-2026	8	07-07-2026
Sprint-4	8	6 Days	07-07-2026	09-07-2026	8	09-07-2026

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit

Velocity = Total Story Points Completed / Number of Sprints

Velocity = 32 / 2 = 16 Story Points per Sprint

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
