

Sprint Planning

A **Sprint** is a fixed period during which a team works to complete a set of planned tasks within a specified timeframe.

An **Epic** is a large feature or functionality that cannot be completed within a single sprint. It is divided into smaller tasks called **User Stories**, which are completed across multiple sprints.

A **User Story** is a small, manageable task that represents a specific functionality within an Epic.

A **Story Point** is a unit used to estimate the effort required to complete a User Story. Story Points are generally estimated using the Fibonacci sequence.

Story Point Scale

- **1** – Very Easy Task
- **2** – Easy Task
- **3** – Moderate Task
- **5** – Difficult Task

Story Point Values: 1, 2, 3, 5

Sprint 1

Epic 1: Data Collection

- Import Electricity Consumption Dataset (**USN-1**) – **2**
- Validate Electricity Consumption Dataset (**USN-2**) – **2**

Epic 2: Data Preparation

- Clean Missing Values (**USN-3**) – **3**
- Create Required Fields and Calculations (**USN-4**) – **3**
- Organize and Format the Dataset (**USN-5**) – **2**

Total Story Points in Sprint 1 = 2 + 2 + 3 + 3 + 2 = 12

Sprint 2

Epic 3: Data Visualization

- Create State-wise Consumption Analysis (**USN-6**) – **3**
- Create Region-wise Consumption Analysis (**USN-7**) – **3**
- Develop Month-wise, Quarter-wise, and Year-wise Visualizations (**USN-8**) – **5**
- Perform Lockdown vs. Recovery Phase Analysis (**USN-9**) – **3**

Epic 4: Dashboard Development

- Develop an Interactive Tableau Dashboard with Filters (**USN-10**) – **3**

Epic 5: Story Creation and Dashboard Publishing

- Create Tableau Story and Publish Dashboard (**USN-11**) – **3**

Total Story Points in Sprint 2 = 3 + 3 + 5 + 3 + 3 + 3 = 20

Total Story Points

- **Sprint 1 = 12**
- **Sprint 2 = 20**

Total Story Points = 12 + 20 = 32

Team Velocity

Velocity = Total Story Points Completed ÷ Number of Sprints

Velocity = $32 \div 2 = 16$ Story Points per Sprint

The team's velocity is 16 Story Points per Sprint.
