

Ideation Phase

Define the Problem Statements

Date	01 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	I'm trying to	But	Because	Which makes me feel
Household electricity consumer Apartment resident Electricity bill payer Energy-conscious customer	Reduce electricity consumption Lower monthly electricity bills Understand energy usage patterns Use electricity efficiently	I cannot identify high-energy-consuming appliances Electricity usage data is difficult to interpret Consumption patterns change frequently I lack detailed insights into my usage	Energy consumption is spread across many devices Monitoring tools are limited Data analysis is not easily accessible Usage varies by season and lifestyle	Concerned about high electricity bills Frustrated by energy wastage Uncertain about how to save energy Motivated to find better energy management solutions

i am	i'm trying to	but	because	which makes me feel
a household electricity consumer	reduce my electricity consumption and electricity bills	it is difficult to understand my electricity usage patterns	electricity consumption varies across appliances and time periods	concerned about energy wastage and high electricity costs

Problem Statement(PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am a household electricity consumer.	I'm trying to reduce my electricity consumption and monthly electricity bills.	But it is difficult to identify which appliances consume the most electricity.	Because electricity usage patterns are complex and not easily visible.	Which makes me feel concerned about energy wastage and increasing electricity costs.
PS-2	I am an electricity provider and energy planner.	I'm trying to understand electricity consumption patterns and forecast future demand.	But electricity usage varies across regions, seasons, and consumer behavior.	Because consumption trends vary based on time, location, and user behavior.	Which makes me feel challenged in planning efficient energy distribution and resource allocation
